

Inkay Spectrum

3D Scanner solution

Spectrum is a universal high-resolution optical 3D scanner based on the safe-to-use structured light technology. It is great for reverse engineering, industrial design, education and science. The scanner has three fields of view, 3.1 MP color industrial cameras and a LED projection module. It is equipped with an automatic turntable and a protective travel case.

Your spectrum of possibilities

Wide range of applications

Due to variable scanning zones, Spectrum digitizes objects from 1 cm up to 3 meters in size

Textured and high-resolution 3D models

The scanner produces 3D data of highest quality, capturing colour texture and small detail with resolution up to 0.06 mm and accuracy up to 0.04 mm

Portable and compact

Low weight and small size make it easy and quick to transport and assemble the scanner.

Excellent value for money

Get a universal instrument for a reasonable price.

Applications

Reverse engineering

Education & science

Industrial design
& car tuning

Quality control

Heritage preservation

Animation

Small details

Complex geometry

Large objects

Specifications

Scanning technology	structured light		
Cameras resolution	3.1 MP		
FOV	L (1)	M (2)	S (3)
Working distance, m	1	0.6	0.3
FOV size, mm	520x400x400	320x250x220	135x100x100
3D-resolution, mm	0.25	0.15	0.06
Accuracy, mm	0.12	0.06	0.04

Software

Everscan 3D Studio software comes with a scanner and allows you to get a finished 3D model of high quality for further work in all popular CAD/CAM programs and virtual 3D modeling environments. Updates of the software are free of charge.

Package contents

- ▶ Scanning module with cameras and LED projector
- ▶ Automatic turntable up to 20 kg load capacity
- ▶ Set of cables
- ▶ Tripod
- ▶ Software with digital license key
- ▶ Set of self-adhesive markers
- ▶ Set of calibration plates
- ▶ Protective travel case
